# PVC SWING DOORS

PVC swing doors are “hands free”, impact operated doors. Their double action springs allow them to open from either side, swinging through a 180° arc and self returning to the centre line of the doorway, while the flexible PVC door leaves absorb the shock and noise of repeated impact without either suffering or inflicting damage. Translucent PVC leaves afford good two way vision, minimising the risk of collisions while maximising available light. PVC Swing Doors are a cost effective option, especially useful in busy traffic situations where tight environmental control is required without impeding traffic flows.

## APPLICATIONS

- Food preparation areas
- Hospitality and Kitchens
- Supermarkets and Retail
- Health and Medical
- Washroom and amenities
- Logistics Facilities
- Laboratories

## OPTIONAL EXTRAS

- Pallet & boot pads
- Traffic Buffers
- Textured Black PVC up to 1200mm high

## MAX SIZE - PEDESTRIAN MODEL

- Single Leaf - 2500mm high x 1250mm wide
- Double Leaf - 2500mm high x 2500mm wide

## MAX SIZE - FORKLIFT MODEL

- Single Leaf - 3500mm high x 1500mm wide
- Double Leaf - 3500mm high x 3000mm wide
