

# BEAT THE BURGLARS

.....DON'T LET THEM BEAT YOU

1

① Threaded Housing Pack is secured to the Concrete floor.

2

② Bracket is permanently attached to the roller door with 12mm coach bolts and a shielding plate.

3

③ When the roller door is in the closed position, the box housing fits over the eyebolt.

4

④ A padlock is then locked through the eyebolt. The shape and design of the housing prevents the padlock from being attacked.

## BENEFITS

- By securing your door in the centre you will prevent broken entry.
- All components are made from steel and are hot dipped galvanised for corrosion resistance.
- The high tensile eyebolt, can be removed to allow unrestricted movement
- Insurance approved and recommended
