

SPECIALIST APPLICATION RAPID DOORS

SPECIALIST APPLICATION RAPID DOORS

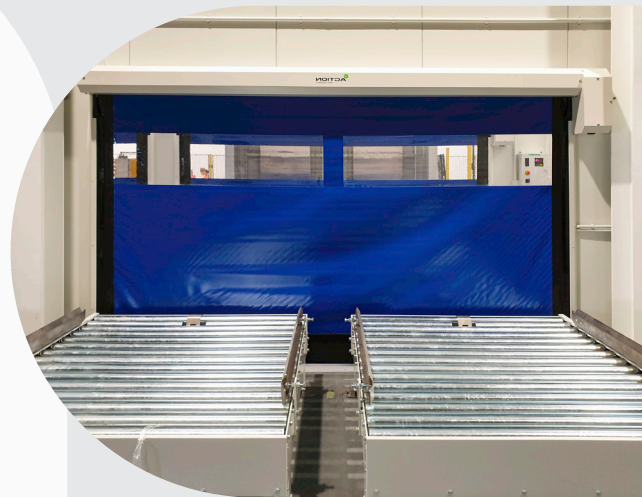

High-speed roll-up doors are ideal for logistics entry and exit areas with frequent traffic, requiring fast switching and high internal cleanliness. They offer multiple functions, including quick switching, temperature insulation, dust and insect protection, and sound insulation. These doors are the preferred industrial choice for reducing energy consumption, maintaining dust-free and clean environments, regulating constant temperature and humidity, and ensuring the required production environment for products.

FEATURES:

- High-quality PVC curtains, easily customized to suit customer requirements
- Motion sensor with Infrared safety protection system
- Robust & reliable
- Ultra fast opening & closing times
- Low running & maintenance cost
- Vermin control
- Keeps processing areas airtight

APPLICATIONS

- Packaging factories
- Any temperature controlled zone
- High use personal access
- Factory entrances
- Conveyor & Pedestrian Airlocks
